### Latest InspecTrak Release Goes Live

T-Soft's flagship Quality Management System offering

**West Newton, PA – November 7, 2005 – T-Soft, Inc.** today announced the latest release of InspecTrak, their flagship Quality Management System software offering. InspecTrak is a comprehensive web based solution able to handle all aspects of the inspection process. InspecTrak coordinates and totally integrates inspection scheduling, results processing, object management, client billing, payroll integration, document management, and end user or client reporting. InspecTrak is designed to help with the scheduling of inspections of manufactured components quality control (including ISO 9001, ISO 14001, QS 9000), equipment maintenance, safety, environmental, regulatory or insurance compliance, or any other inspection. InspecTrak was initially developed for T-Soft's customer, Göbel & Partner Ltd., ([www.gpqm.com](http://www.gpqm.com)).

Göbel & Partner Ltd. (G&P), headquartered in the United Kingdom, is a leading European Quality Management Company. Goebel & Partner inspects the quality of automotive component manufacturers throughout Europe. G&P customers include major automotive OEMs including Audi, BMW, Cosworth, DaimlerChrysler, Ford, GME Fiat (Saab, Vauxhall Opel, Fiat), Honda, LDV, MG Rover, Nissan, PAG (Jaguar, Land Rover, Aston Martin, Volvo), Powertrain Ltd., Renault, Skoda, Toyota and Volkswagen.

T-Soft initially developed the intranet solution to manage the 'containment, control and rework' sector of Göbel & Partner's business. G&P has since contracted with T-Soft to support and extend the system for internal purposes and to expose analysis/Work in Process reporting to G&P's customer base via an extranet. InspecTrak, the Quality Management System which G&P refers to internally as QTrak, handles and integrates every aspect of the quality inspection process from scheduling the inspection to client billing, payroll integration, document management and reporting (control and executive level). The result to Göbel & Partner has been increased revenue due to accurate record keeping, improved customer satisfaction due to more efficient scheduling of inspections, and improved information flow due to more efficient document control and more accurate reporting.

According to Nat McBride, Project Manager for Göbel & Partner, "QTrak exceeded our expectations both in the time savings to our end users and in reduction of errors! Our business is a demanding one. We would not have been able to find anyone else to meet our demands. T-Soft had an amazing ability to adapt with willingness and flexibility through the entire process. This helped keep the project moving forward!"

"We're excited about InspecTrak [QTrak] and what it means for Göbel & Partner", says Frank Greenawalt, President of T-Soft. "Both Göbel & Partner and their

customers will have instantaneous information on the status of inspections and results once the inspections are completed. This will have a direct impact on the quality of the manufactured product”

According to Paula Charlesworth, Göbel & Partner’s Office Manger, QTrak significantly reduced the time personnel needed to work on inspections billing in accounts receivable. “We were able to reduce the time spent by our staff by 40%. In addition the system was more accurate.” Prior to QTrak, if paperwork was delayed, Göbel & Partner was not able to bill the inspection. “QTrak audits itself, if anything in the inspection process is delayed; QTrak automatically triggers notifications to the appropriate personnel.”

InspeTrak, T-Soft’s flagship Inspection Scheduling and Management software, is available directly from T-Soft. Contact T-Soft at [info@tsoft-inc.com](mailto:info@tsoft-inc.com) or visit T-Soft’s website ([www.tsoft-inc.com](http://www.tsoft-inc.com)) for additional details.

#### About T-Soft, Inc.

T-Soft was founded in 1993 to provide personalized and effective technology consulting services, project management services, and custom software development for its customers.

T-Soft’s core software development areas are:

- Web System Development
- Inspection Scheduling & Management
- E Commerce Applications
- Client/Server Application Development
